GOAL

Gift Of Life

What is Gift of Life ?

- **Helps children who suffer from congenital heart diseases.**
- **Signature Project of RCS.**
- **Since more than 15 years.**

Congenital heart diseases are conditions existing at birth and often before birth, or that develops during the first month of life (neonatal diseases), regardless of causation.

Why GOL ?

High incidences of birth defects

- **Birth defects** rise:

1996: 87.7/10,000

2010: 149.9/10,000 **+70.9%**

- **Congenital heart diseases** are the number one birth defect:

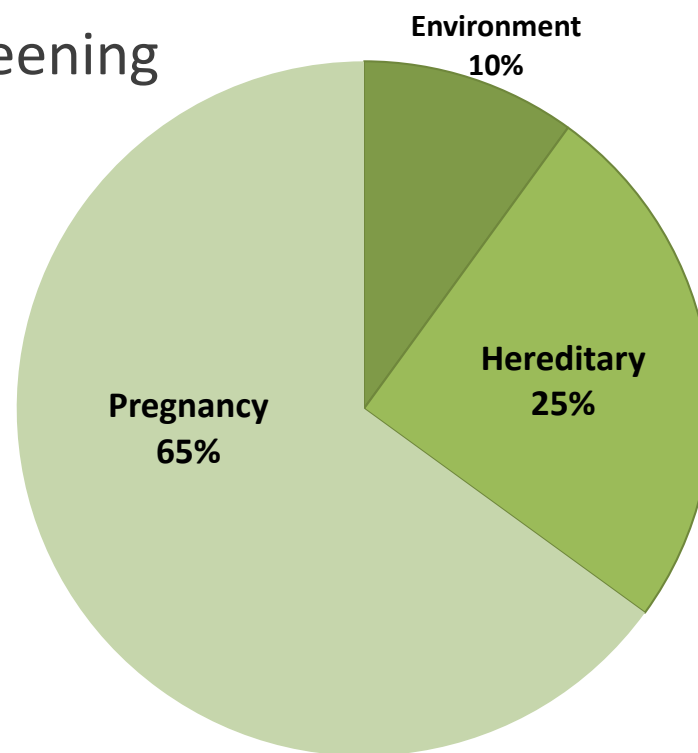

2003-2007: **+23.25%**

260,000 children or **32.7 /10,000 each year.**

Why GOL ?

High incidences of birth defects

- Low rate of pre-marital screening
- Poor hygiene awareness
- Improper drug use and limited access to health care or examination during pregnancy
- Exposure to industrial hazard or waste, a.s.o.

All this makes pregnant women susceptible to deliver children with **birth defects.**

Why GOL ?

High Mortality Rate due to CHD

- 2010: **300'000 Children died before the age of 5 years**
16.4% of the mortality rate

Only India, Nigeria, Congo and Pakistan are higher

- **Congenital Heart Diseases** are the number one killer.
