

FanJingYu 范敬煜

Today, 1st of August, 2017, we have met FanJingYu. He is a boy of 6 years old coming from Henan province. His disease was discovered not long after he was born and he has had 3 surgeries so far. As his dad is handicapped his family relies mainly on his grandfather (who is a farmer) for their living.

Tomorrow he should leave the hospital after two months of being there. He looked good. He was pretty shy but smiled to us most of the time, not understanding very well why we were there but happy that we brought toys. Though the surgery was a success only the next check-ups will determine if he needs another surgery or not. Hopefully he'll recover completely and be able to live a normal life.
